

Enterprise AI Agents on iTmethodsONE

The power of AI agents, supported by our dedicated human engineer, to help your business succeed.

ONEagent

AI Engineer

The challenge

Every department is racing to adopt AI agents, but adoption often happens in silos, leading to fragmented tools, inconsistent results, and compliance risks. Most platforms also leave you to figure it out on your own.

That's why we built ONEagent Studio on iTmethodsONE: giving you the power of AI combined with human expertise. You get agents supported by a dedicated engineer from our team, working with you from day one to design, configure, and optimize solutions that deliver measurable value and operate securely across your enterprise.

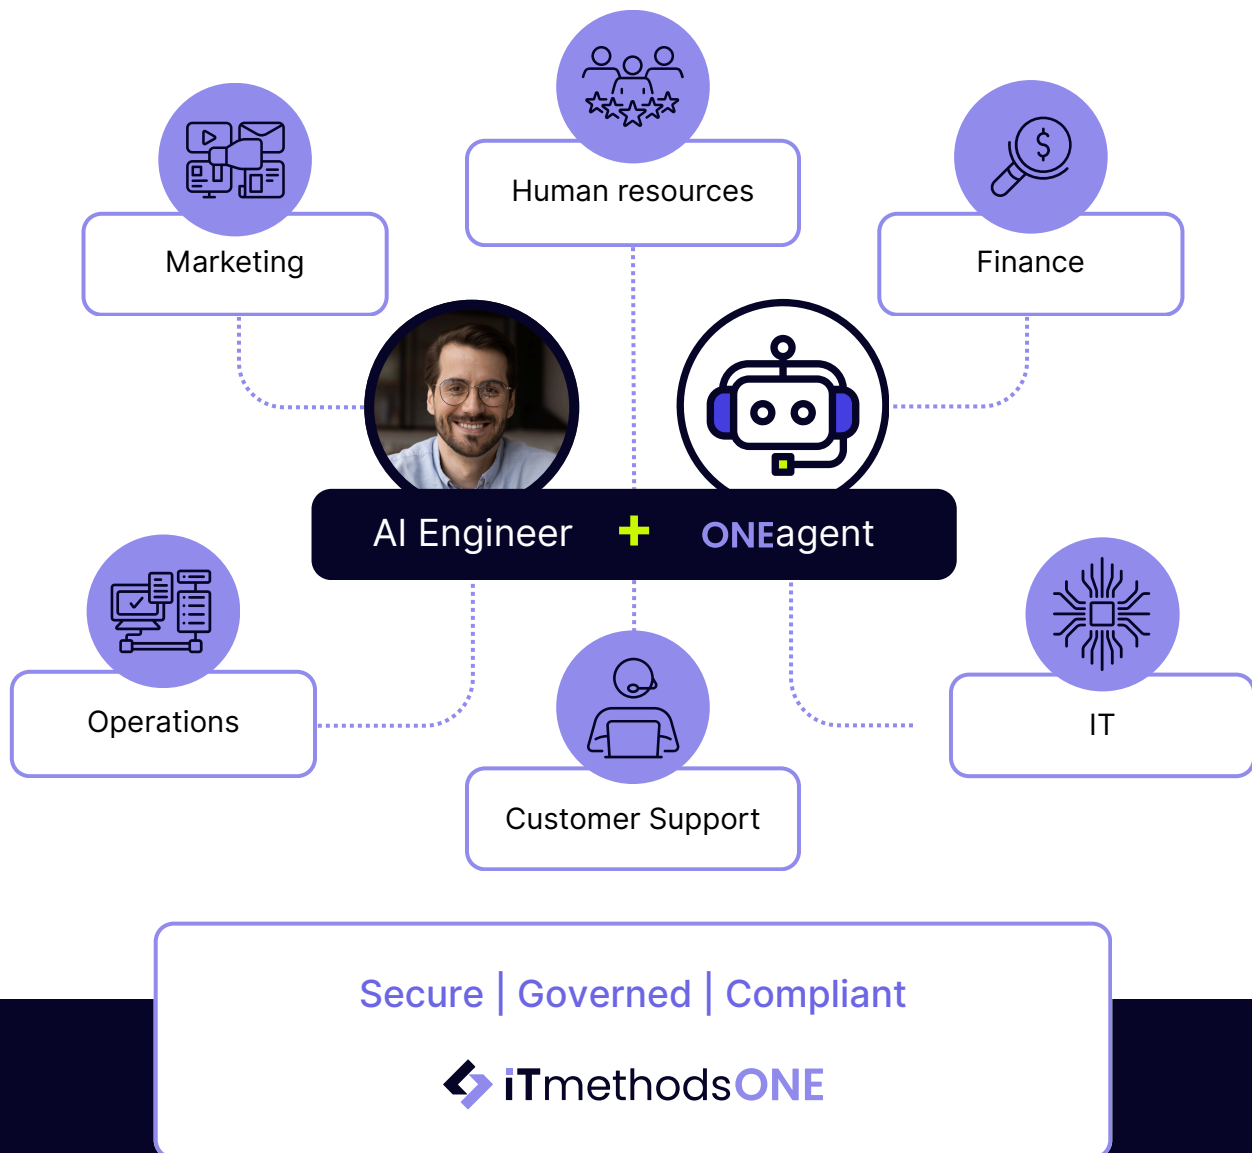

Standalone agents are point solutions. iTmethodsONE adds governance and human support.

— IT Executive, Major Global Bank

Business outcomes

- ✓ **Efficiency**
Reduce duplication of spend on disconnected tools.
- ✓ **Trust**
Ensure AI outputs are consistent, explainable, and auditable.
- ✓ **Agility**
Quickly adopt new AI technologies while staying compliant.
- ✓ **Scalability**
Roll out agents across all departments on one governed platform.
- ✓ **Cross-functional alignment**
HR, Finance, Ops, Marketing, and Support agents working together, not in silos.

ONEagent studio

Use cases across the enterprise

Marketing

- Optimize spend across campaigns
- Generate blogs, social posts, and emails

Human resources

- Screen resumes and shortlist candidates
- Automate onboarding workflows

Finance
